

Watersheds to the Sea

K-12 Project WET Workshop

Nov 16, 2019

We invite you to a day exploring how to connect your students to an understanding and caring for their local watershed and its connection to the sea using Project WET activities, while engaging students in concepts and skills at the heart of NGSS and Common Core standards. Located on the Russian River we will have hands-on activities including; water quality monitoring, aquatic macro-invertebrate exploration, and a tour of our fish viewing gallery. The training will also highlight potential opportunities to engage your students in stewardship opportunities to apply what they learn. Participants will walk away with a copy of Project WET Guide 2.0, **Opportunity to order EEI curriculum units**, lunch, an agenda showing standard connections, access to new Project WET

The interdisciplinary Project WET (**Water Education for Teachers**) are an effective tool for integrating student knowledge of concepts and skills related to water resources into activities that include real-life based scenarios and simulations that provide strong foundations for STEAM, Project-based and Service-Learning programs. Project WET activities are designed to supplement existing curriculum, including the use of EEI (**Education & the Environment Initiative**) curriculum units – and are *correlated to Common Core and Next Generation Science Standards*.

Nov 16, 2019 (9:00 am to 4:30 pm)
Westside Water Education Center
9703 Wohler Road
(Off River Rd., near Forestville, CA)

To register: <https://www.sonomawater.org/workshops>

Space is limited for this free workshop! Register by Nov 1, 2019

Lunch will be provided.
